

Manufacturer of Distinctive Outdoor Fireplaces

System Points and Options

3 volt Battery Operated

- Battery remote receiver and control module
- Electronic ignition powered by battery pack
- Batteries included with system are pre-tested and last 2-3 years
- To install attach gas line to electronic ignition box and ready for use
- 24" only

110 System (24 volt)

- To install attach gas line and power line (not outlet plug in, wire hook up) to ignition box
- No batteries needed except for the remote control
- Comes in 24", 30" and 36" pans

Gas

- System uses natural gas
- Can purchase a conversion kit to run the system off of liquid propane
- 24" burns 60k BTU's per hour due to the regulator attached for cost savings
- 30" burns 130k BTU's & 36" burns 180k BTU's
- Competitor units use between 90k and 120k BTU's
- Both systems produce the same amount of warmth (tested)

Aluminum Round Pan

- Gas comes through brass jets that are angled to produce a flame that looks similar to a camp fire
 - 5 jets 24" & 11 jets 30" & 16 jets 36"
- Pan never gets too hot to touch on the bottom
- Can use material other than the log kit in the pan as long as it does not cover the top of the jets
- Min height 17" off the ground to give 6" space for drainage and for the gas line

27" or 31" Round Copper Lid

- Can be removed to drop down on the hearth and cover the system
- Traps heat and centralizes it
- Can't be used on a system over 30" round or lid will melt (includes 36")

Log Kit

- Logs are made of concrete with steel reinforcement
- Long lasting, sturdy, and natural looking
- Kit includes lava rocks
- Log sizes
 - 24" 7 piece logs
 - 30" 9 piece logs
 - 36" 14 piece logs

CSA Certified on 24"

- System is safe to install by anyone
- Can be installed in any backyard (like a gas grill)
- System will pass building codes in the US and Canada

Automatic Relight Function

- When flame blows out the system will automatically relight as long as gas is still flowing

WT Hearth

- Comes in round or 12 sided, both 48" outside diameter and 44" high
- Can order a 12" extension
- Ring is steel reinforced
- Customize with mix & match selections of 4 acid washed concrete colors and 4 granite tile options
- Tile is set in the top ring and the base sides to match
- Can have tile other than the granite selections, but must be granite or porcelain (not marble)
- If tile is supplied by the customer, need to have 13 -12"x12" pieces

Custom Hearth Specs

- 30" pan needs hearth opening min size of 30"
- 36" pan needs hearth opening min size of 36"
- 24" pan need hearth opening min size of 24½"
- Hearth needs lip at 4" deep for 24" pan, and 2" deep on 30" & 36" pans or set cinder blocks for the pan to sit on
- Need sufficient drainage built into hearth base
