CIRCLE and SQUARE OPENINGS

RECTANGULAR OPENINGS and OUTDOOR FIREPLACES

Warming Trends' patented CROSSFIRE® Brass Burners are the industry-leading burner systems. Our burners deliver a taller, brighter, more natural flame with a fraction of the fuel consumed by competitors.

ORIGINAL - CFB

The **Original** burner system is designed to provide a beautiful, full flame over a broad footprint.

BTU Range: 60K - 450K
WATERSTOP®*: Yes
Plate/Pan: Circle or Square

OCTAGONAL - CFBO

The **Octagonal** burner is one of our most popular burner systems. More compact than the Original Burner, it creates a concentrated, round flame within a smaller footprint. It's perfect for circular or square features.

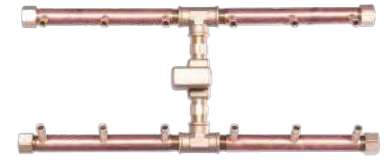

BTU Range: 140K - 360K
WATERSTOP®*: Yes
Plate/Pan: Circle or Square

LINEAR - CFBL

The jets on our **Linear** burners are evenly spaced out to deliver an elegant "line" of fire. Linears are popular for rectangular features when the width of the opening is narrower (i.e. 6" - 12"). Standard burner offerings are straight, but any linear burner can easily be curved to fit most radial designs.

BTU Range: 90K - 270K
WATERSTOP®*: Yes**
Plate/Pan: Rectangle

H-STYLE - CFBH

H burners have two parallel rows of jets that are precisely angled toward each other to create a flame with a wider base that intersect to make a beautiful, full flame.

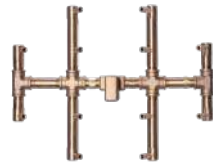

BTU Range: 120K - 340K
WATERSTOP®*: Yes
Plate/Pan: Rectangle

TREE-STYLE - CFBT

Unlike any other burner on the market, our **Tree-Style** burners create a thick "Wall of Fire" with an impressive flame for rectangular width openings of 10" - 16". (The Tree-Style burner is featured on the cover of this brochure.)

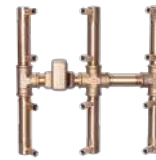

BTU Range: 110K - 470K
WATERSTOP®*: Yes**
Plate/Pan: Rectangle

CIRCLE TREE-STYLE - CFBCT

Circle Tree-Style burners are based on our popular Tree burners, but are stretched to compliment round or square features. The location and direction of the jets on these burners are engineered to bring impressive flame to small and medium sized features.

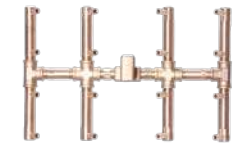

BTU Range: 120K - 440K
WATERSTOP®*: Yes
Plate/Pan: Circle or Square

SQUARE TREE-STYLE - CFBST

The **Square Tree-Style** burners are a much wider version of our Tree burners, designed to deliver a flame that completely fills a square opening. These burners have the largest BTU offerings among our standard burners.

BTU Range: 120K - 500K
WATERSTOP®*: Yes
Plate/Pan: Circle or Square

DOUBLE TREE-STYLE - CFBDT

The **Double Tree-Style** burner is based on the same design as our Square Tree-Style burners, but in lengths to fit perfectly in rectangular openings of 15" or wider. These burners create an impressive, wide flame!

BTU Range: 160K - 480K
WATERSTOP®*: Yes
Plate/Pan: Rectangle

*AVAILABLE ONLY ON CROSSFIRE BURNER SYSTEMS, the **WATERSTOP®** fitting is the only solution to an industry-wide challenge- protecting the gas line and electronics from water and debris. The patented fitting prevents water and debris from entering the gas line or reaching electronics below the burner system, preventing damage and service calls.

All burners available in NG (NATURAL GAS) or LP (LIQUID PROPANE).

****WATERSTOP** is included when built with an end gas inlet. Available upon request at no additional cost.
